EDUCATION

Government College University, Lahore

ICS-Physics | Overall: 1014 / 1200 | A+ in English and Math

Lahore

Sep 2022 - May 2024

Lahore Model School

Group Science | Overall: 1049/1100 | A+

Lahore

Sep 2011 - Feb 2022

PROJECTS

Space Invaders Game

C++

- Developed a console-based ASCII game inspired by Space Invaders.
- Implemented player movement, shooting logic, and enemy behavior using arrays and loops.

StudyForge Mobile App

React Native, Expo

- Developed a cross-platform productivity application featuring native camera integration for document scanning and a dynamic timetable scheduler.
- Implemented a custom dashboard with SVG-based analytics charts, task management tools, and a Pomodoro focus timer to optimize study routines.

Database Management System

C++, file handling

- Created a small-scale database system using arrays and structures.
- Added CRUD functionalities: Add, Delete, Update, and View records.

Netflix Clone

HTML, CSS

- Designed a static front-end replica of Netflix to strengthen my understanding of HTML structure and CSS layout design.
- Implemented core page elements including navigation bar, movie banners, and category sections.

EXTRACURRICULAR ACTIVITIES

Build with AI workshop - GDG Cloud Lahore

Sep 27, 2025

- Learned to develop portfolio websites and deploy creative ideas using Firebase.
- Received Certificate of Participation.

Coding spree - Technoverse by ACM CUI

June 1st, 2025

- Solved algorithmic problems inspired by LeetCode challenges under time constraints.

Hacktoberfest - Open Source Event by CNSL

Oct 18, 2025

- Participated in Hacktoberfest event focused on open-source software collaboration.
- Gained insights into GitHub workflows, AI agents, and large language models (LLMs).
- Engaged with developers worldwide to understand community-driven AI innovation.

SKILLS

Programming Languages: C++, C, Python, Java

Web Languages: HTML, CSS

Tools / Platforms: GitHub, VS code, CodeBlocks
